THE SOVIET JOURNAL OF NONDESTRUCTIVE TESTING

Numbers 1-6, 1970

THE SOVIET JOURNAL OF NONDESTRUCTIVE TESTING

Numbers 1-6, 1970

(A translation of Defektoskopiya)

Number 1 January-February, 1970

	Engl.	Russ.
ULTRASONIC METHODS		
Effect of a Roughly Worked Surface on Diffraction of the Refracted Wave in the Immersion Method of Introducing Ultrasound—M. P. Ural'skii	1	3
Flaw Detection in Steam Pipes—N. V. Vinogradov, Z. M. Kishenevskaya, T. V. Khasnash and V. Ya. Shvartsman	6	8
Improvement of the Noise Stability of the Mirro-Shadow Method of Ultrasound Inspection—G. T. Bordyugov, V. A. Lonchak, P. F. Shapovalov, and D. S. Banku	8	11
A Reliability Testing Jig for Ultrasonic Flaw Detectors—V. A. Chegorinskii and V. S. Vzorov	10	13
Ultrasonic Flaw Detection in Finned Tubes—V. T. Pronyakin, Ya. F. Anikeev, A. V. Gorshkov, E. M. Lovyakin, M. G. Nemirovskii, and V. S. Zagorul'ko	13	16
RADIATION METHODS		
Exposure Meter for Betatron Radiography—V. D. Vasil'ev, V. S. Samsonov, Yu. I. Udralov, and V. V. Filippov	16	20
Use of a Thermal Method for Observing Defects Such as Breaks in Continuity in Metallic and Nonmetallic Objects—N. A. Bekeshko and A. B. Upadyshev	20	24
Present State of Methods for Monitoring the Temperature Fields of Integrated Circuits—N. A. Bekeshko	25	30
Xerographic Unit PKR-1—A. L. Sotnichenko, V. I. Gorbachev, and V. M. Lantukh	31	37
ELECTROMAGNETIC METHODS		
Approximate Design Procedure for Feedthrough Type Eddy-Current Transducers—N. N. Lokshina and Yu. M. Shkarlet	34	41
Relationship between the Central Demagnetizing Factor of Ferromagnetic Plates and Their Magnetization—G. A. Burtsev	41	49
Hysteresis in the Magnetizing Field of Ferromagnetic Plates—G. A. Burtsev	46	55
Signal from an Applied Transducer as a Function of the Change in Dimensions and Position of Fracture Type Defects—P. I. Beda	51	62
On Calculating the Harmonics of the EMF of Ferroprobes with Longitudinal Excitation in the Case of Large Measured Fields—Yu. F. Ponomarev	56	68
Monitoring the Microstructure of the Metal in Thin-Wall Tubes Using Harmonic Analysis of the Signal from an "ÉMID" Type Magnetoinductive Instrument—V. I. Roitman, I. Yu. Korobochkin, S. S. Anoprienko, and N. I. Maisterenko	64	78
Use of Composite Cores in Ferroprobes with Longitudinal Excitation—É. É. Stoinskaya, D. A. Shturkin, and G. A. Burtsev	68	82
Magnetic Field of a Flaw around Which a Direct or Alternating Current is Flowing. II. Current-Density Distribution around a Flaw in a Plane Magnetic Sample—N. P. Benklevskaya and N. N. Zatsepin	74	89
Discrimination Ability of a Superposed Detecting System for Surface Cracks in Inductive Testing of Steel Components. I. Analysis of Physical Principles of Testing and an Investigation Method—V. V. Vlasov and V. A. Komarov.	80	95

Discrimination Ability of a Superposed Detecting System for Surface Cracks in Inductive Testing of Steel Components. II. Investigation of the Reaction of the Detecting Element to Decarburized and Cold Worked Areas—V. V. Vlasov and V. A. Komarov . 86 101
Discrimination Ability of a Superposed Detecting System for Surface Cracks in Inductive Testing of Steel Components. III. Investigation of the Reaction of the Detecting Element to Cracks Surrounded by Decarburized Material—V. V. Vlasov and V. A. Komarov 91 107

LUMINESCENT METHODS
Evaluation of Red Liquid Penetrants for Color Defectoscopy Utilizing the Brightness/Color Visibility Coefficient—Yu. A. Glazkov 96 114

BRIEF COMMUNICATIONS
Electronic Time Relay for the Photographic Processing of an X-Ray Film —V. D. Vasil'ev, Yu. I. Udralov, and V. V. Filippov 102 121
Probe for Mechanized Ultrasonic Inspection—V. G. Sherbinskii and I. N. Ermolov 105 123
Apparatus for the Production on-Line Testing of Bands—A. D. Fesenko, G. A. Frolov, I. F. Lygun, A. S. Gadal'tsev, A. I. Menyailenko, and P. E. Osipenko 108 126
Short-Pulse Generator for Ultrasonic Flaw Detectors—M. V. Korolev 110 127
Scintillation Defectoscope Using a Shadow Contrast Image on a CRT Screen —A. V. Pokrovskii, G. E. Butakova, and Yu. P. Ivanchenko 112 130
Immersion Method of Inspecting the Grain Size of a Tube Metal Using the DSK-1 Instrument—E. A. Lubinskii and L. A. Veselovskii 114 132
Nondestructive Magnetic Inspection of Thermoelectric Conductors—G. A. Zabirov and M. I. Bogomolova 117 135
Industrial Capabilities of BAS-1 Monitoring Instruments—N. A. Nilov, A. A. Dolgii, and A. S. Volkov 119 136
Defectoscopy of a Large Assortment of Tubes in the German Democratic Republic —V. N. Ripnyi and É. S. Veretennikov 122 139
The Use of Electromagnetic Excitation and Recording of Ultrasound to Estimate the Structure of Metals—V. G. Éichina and G. A. Budenkov 125 141

INFORMATION
Apparatus and Methods for X-Ray Analysis 128 144
Fast Acting Defect Marker 129 144

ERRATA 130

Number 2 March-April, 1970

Technical Progress and the Tasks of Technical Quality Control 131 3

ELECTROMAGNETIC METHODS
Study of the Fatigue Strength of Metals by the Eddy-Current Method, Using the ÉMID-4M Tester—V. V. Nyukhalov, P. G. Guzenkov, and T. Ya. Gorazdovskii 135 9
Characteristics of Defectoscopes Using Magnetic Amplifiers for Regulating Current —G. S. Shelikhov and S. P. Luts'ko 140 15
Contactless System for Transverse Magnetization of Tubes—N. S. Savorovskii, G. S. Tropnikov, and É. V. Chuprinyak 146 23
Testing the Surface Decarburization of Calibrated ShKh15 Steel Bars—V. V. Levitin, B. M. Zadko, A. V. Maksimenko, O. M. Kuimova, G. Kh. Gabuev, V. M. Bolotnyi, N. K. Kovalenko, and A. Ya. Rachok. 149 25
Discriminating Ability of a Superposed Detecting System for Surface Cracks in Inductive Testing of Steel Components. IV. The Defectoscope Circuit—V. V. Vlasov, V. A. Komarov, and M. A. Kop'ev 155 32

Analysis of an Eddy Current Converter for Gauging Thickness and Measuring Electroconductivity —V. A. Sandovskii 161 39
Standard Specimens for Nondestructive Monitoring —Yu. A. Bdovin, I. E. Korobeinikova, A. Z. Raikhman, and A. B. Shaevich 166 44

ULTRASONIC METHODS
The Concept of a Normal Probe's Emission-Reception Field—I. N. Ermolov 171 51
Effect of Statistically Distributed Nonuniformities on Ultrasonic Structural Analysis of Articles of Complex Form—N. A. Kesler and Yu. B. Sviridov 177 58
Standardization of Ultrasonic Apparatus for Flaw Detection in Pipes—R. M. Brusentsova, K. V. Zakhvatikhata, and V. I. Roitman 182 63
Frequency Characteristics of Mechanically Undamped Piezoelectric Converters Loaded with Electrical Circuits—R. I. Yu. Kazhis and V. I. Domarkas 190 73
Effect of the Electrical Load and of the Electromechanical Coupling Coefficient on the Spectral Composition of Echo Signals from a Piezoelectric Transducer—S. E. Baryshev . . . 196 80
The ASD-ÉTs Electronic Digital Automatic Defect Indicator—S. E. Baryshev, N. N. Dubrovin, V. G. Davydov, and V. A. Smirnov 202 87
Experimental Investigation of the Effect of the Ultrasonic Scattering Field on the Results of Ultrasonic Testing by the Immersion Method—M. P. Ural'skii 205 90

RADIATION METHODS
Nondestructive Testing of Thick Dielectric Sheets—M. G. Aleksandrova, A. N. Belyanin, and A. L. Zelenkov 210 97
Optimal Time of Using a Radioisotope Source of Radiation in Nondestructive Testing —A. G. Sul'kin, V. S. Akopov, Yu. P. Komarova, and A. E. Borisov 215 102
Detection of Defects in Thin-Walled Tubes Based on the Surface Distribution of Thermal Fields—N. A. Bekeshko and A. B. Upadyshev 219 106

BRIEF COMMUNICATIONS
Effect of Grain Size Distribution on Rayleigh Scattering of Ultrasonic Waves —V. M. Merkulova 223 111
A Device for Magnetically Recording the Field of a Defect—V. S. Kozlov and V. F. Kuntsevich 226 113
Use of Quasi-relay Ultrasonic Waves for Testing the Quality of Seams of Electrically Welded Tubes—B. V. Kostyukov and A. V. Malinka 228 115
Thermal Method for Rejecting Defective Resistors—L. L. Barvinskii and E. L. Polomar' 230 116
Effect of Averaging Time and Introscope Inertia on the Unsharpness of an Image of a Moving Object—B. M. Kanter, M. D. Kovalev, F. N. Novitskii, and A. M. Yakobson 233 118
Reduction of the Fluctuation Noise by the Lagging Component of the Introscope —F. N. Novitskii and A. M. Yakobson 238 122
Functional Automatic Defect Indicator, ASD-F1—S. E. Baryshev and V. A. Pilui 242 125

Number 3 May-June, 1970

ULTRASONIC METHODS
Investigation of an Electromagnetic-Acoustical Converter of Shear Oscillations —Yu. M. Shkarlet and N. N. Lokshina 247 3
Passage of Lamb Waves through a Region of a Plate with a Stratification —L. G. Merkulov and S. I. Rokhlin 256 13
Directional Characteristic of a Piston Radiator under Pulsed Conditions —A. A. Pranitskii, A. F. Mel'kanovich, and G. P. Glazacheva 265 22
Calculating the Electroacoustic Tract of an Ultrasonic Resonance Thickness Meter (Gage) —S. A. Filimonov 269 27

Noise of an Electron-Acoustic Converter—Yu. A. Karminskii, Yu. A. Kondrat'ev, and A. A. Tukkaev 275 33
Ultrasonic Radiators for Defectoscopy of Tubes by Means of Normal Waves —V. S. Zagorul'ko 279 37
URT-10 Ultrasonic Thickness Gauge—V. S. Grebennik and S. A. Filimonov 284 43
Ultrasonic Immersion Inspection of Welded Turbine Blade Rims—A. I. Safonov and V. P. Savchenko 289 49
Some Problems in the Technology of Manufacturing Searchers for Ultrasonic Defectoscopes —L. M. Fridlendr 294 55

ELECTROMAGNETIC METHODS
Uncalibrated Control of Tube Wall Thickness by Means of Potential Drop —M.I. Brainin, É. I. Brainin, V. V. Solov'yanova, and A. K. Tutka 298 60
Magnetic Defectoscopy of Rubber Conveyer Belts—Yu. G. Evtukhov, V. P. Dovzhenko, V. E. Madudov, A. I. Pleskachevskii, and N. G. Chirkov 309 72
Instrument for Measuring the Thickness of Decarburized Layers—F. N. Nuriev, G. V. Zaitsev, and V. A. Charov 316 80

RADIATION METHODS
Statistical Analysis of a Radiometric Betatron Defectoscope with Inertial Smoothing of the Signal—V. A. Vorob'ev, Yu. D. Gavkalov, and G. P. Tarasov 320 86
Spectral Sensitivity of an X-Ray Vidicon with a Lead Oxide Target—A. P. Shpagin 326 92
New Sharp-Focus Iridium-192 Sources for Radiography—V. G. Firstov, A. N. Maiorov, A. G. Sul'kin, G. A.Cherevatenko, and V. V. Yakshin 329 95

LUMINESCENCE AND OTHER METHODS
Quality Control of Integrated Circuits by Means of Surface Infrared Radiation —N. A. Bekeshko, A. B. Upadyshev, and V. S. Kiselev 333 101
Interprobe Interval of a Radiointroscope As an Open Very High Frequency Resonator —A. N. Belyanin 337 105
Development of Quenching Compositions for the Luminescence Defectoscopy of Leaks in Plexiglas—L. Ya. Malkes, N. P. Kovalenko, and R. K. Énglin 341 111

BRIEF COMMUNICATIONS
Ultrasonic Locator of the Gap Type for Mechanizing the Testing of Parts —I. N. Ermolov and V. D. Korolev 343 114
Attachment for Rapid Photoprocessing of Roentgenograms—V. F. Dianov 346 117
Densimetry on the Basis of Back-Scattered γ-Radiation—D. B. Pozdneev and N. V. Krasnoshchekov 347 118
Use of Contactless Sensing Elements in Semiautomatic Ferroprobe Coercimeters —V. M. Frantsevich, V. A. Zakharov, and T. V. Mil'man 351 122
Powerful Ultraviolet Illuminator for Luminescent Defectoscopy—Yu. M. Anin 354 124
Check of the Sensitivity of Radiography of Welds—V. F.Dianov 357 127

ERRATA 359

Number 4 July-August, 1970

ULTRASONIC METHODS
Physical Basis of Spectral Method of Measuring the Damping of Ultrasonic Waves in Materials—L. G. Merkulov and V. A. Tokarev 361 3
Calculation of the Spectrum of Wave Numbers for Lamb Waves in a Plate—L. G. Merkulov, S. I. Rokhlin, and O. P. Zobnin 369 12
Reflection of Ultrasound from Various Types of Defects—I. N. Ermolov 374 17
Axial Phase and Group Velocities for Normal Waves in a Hollow Cylinder—G. I. Georgiev 381 24

Investigation of the Sound Channel during Structural Analysis of the Metal of Tubes by Means of Normal Waves—N. A. Kesler 385 29
Ultrasonic Statistical Method of Structural Analysis of Materials—N. A. Kesler 390 35
Investigation of the Electroacoustic Path of an Ultrasonic Pulse-Resonance Thickness Gauge —V. A. Kalinin 393 39
Operation of a Piezoelectric Element at Low Frequencies—Yu. V. Lange 404 53
Two-Frequency Ultrasonic Flaw Detector—V. T. Pronyakin, V. T. Limarov, and I. A. Astaf'ev . 409 59
Ultrasonic Flaw Detection in Cold-Rolled Steel Sheet on a Cross-Cutting Unit —D. F. Kravchenko, A. N. Kurkin, A. P. Luk'yanenko, G. I. Nalcha, and D. A. Tursunov 413 63
Portable Lamination Detector for Metal Structures—V. S. Grebennik and V. I. Ryk 416 67

RADIATION METHODS

Use of Factor Analysis in Synthesizing the Structures of the Computing Devices Used for Analyzing the Signals in Radiometric Betatron Defectoscopes—A. A. Vorob'ev, V. A. Vorob'ev, Yu. D. Gavkalov, and G. P. Tarasov 419 71

ELECTROMAGNETIC METHODS

Movement of a Current-Conducting Plate Parallel to the Plane of a Striding-Type Transducer —V. V. Klyuev, M. L. Faingoiz, and G. G. Kapelin 425 78
Calculation of Insertion EMF during Testing of Bimetallic Cylinders with a Thin Surface Layer —Yu. K. Fedosenko 433 86
Effect of the Inconstancy of the Gap between the Object and the Pole Tips of the Electromagnet on the Demagnetizing Current of a Ferroprobe Coercimeter with an Attached Electromagnet—V. A. Zakharov, M. N. Mikheev, V. P. Tabachnik, V. M. Frantsevich, and L. A. Fridman 438 91
Methods of Reducing the Effect of the Gap between an Object and the Pole Tips of an Electromagnet on the Demagnetizing Current of a Ferroprobe Coercimeter with an Attached Electromagnet—V. A. Zakharov, M. N. Mikheev, and V. M. Frantsevich 446 100
Suppression of Negative Surges in a Magnetic Defectoscope—M. É. Khurgin 451 107
1D-1M Flaw Detector for Inspecting the Continuity of Glass and Enamel Coatings on the Inside Surface of Tubes—A. A. Romanenko and N. G. Yanchenko 455 112
Inspection of Workhardening of Steel Shafts by the Eddy Current Method. I —N. M. Rodigin, L. S. Pravdin, V. P. Syrochkin, B. A. Sirotkin, R. N. Utochkin, and V. D. Sukhanov 459 117
Inspection of Cold Hardening of Steel Shafts by the Eddy Current Method. II —N. M. Rodigin, L. S. Pravdin, V. P. Syrochkin, B. A. Sirotkin, R. N. Utochkin, and V. D. Sukhanov 465 126
Inspection of Work Hardening of Steel Shafts by the Eddy Current Method. III —N. M. Rodigin, L. S. Pravdin, V. P. Syrochkin, B. A. Sirotkin, R. N. Utochkin, and V. D. Sukhanov 470 130

BRIEF COMMUNICATIONS

Comparative Experimental Evaluation of Various Systems for Visual X-Ray Flaw Detection Using Vacuum Tube Devices—A. M. Yakobson, B. I. Leonov, B. M. Kanter, and M. Kh. Kopeliovich 476 137
Polarization Method of Examining Defects in Lucite Components—V. P. Burmistrov 479 140
Effect of Surface-Active Substances on Stability of Ultrasound Inspection—P. T. Il'yukha, A. A. Lukashev, Kh. Z. Varnovitskaya, and A. S. Demchenko 480 141
Statistical Distribution of Welding Defects with Respect to Azimuth—V. G. Shcherbinskii and V. M. Myakishev 483 143
Unit for Intermittent Automatic Regulation of Amplification (IARA) in the Ultrasonic Defectoscope UDM-1M—A. M. Zorin, V. I. Ryk, I. A. Rozanova, V. N. Sukhanov, V. G. Shcherbinskii, A. R. Agapov, and M. S. Romanov 485 145
Oscillograph for Defectoscopes—I. A. Dvoeglazov and G. K. Zykov 487 146

Noise Protection System—I. A. Dvoeglazov and G. K. Zykov 488 147
Discernment of Flaws in Turbogenerator Shroud Rings by Eddy-Current Technique —Yu. M. Gorbachev and N. M. Makarov 490 148
Flaw Recorder—V. P. Izotov and Yu. M. Bron 491 149
Semiconductor Signal Measurer (Defect Simulator)—N. V. Zimin, A. Z. Raikhman, and G. D. Belov 494 151
Electromagnetic Investigation of Structural Susceptibility to Damage of Bearings in Contact Fatigue—V. V. Chernyak, S. L. Naumov, and A. M. Zaitsev 496 154
Coercimeters with Attached Electromagnets Used in Quality Control—G. I. Mikhailovskaya, V. L. Nemkov, and S. V. Sytnik 498 156
Ultrasonic Inspection of Bending of Boiler Tubes—G. G. Medvedev and V. V. Sengizhek 500 157

INFORMATION
NIIIN March 1970 Conference and Workshop on Electromagnetic-Acoustic Nondestructive Testing—Yu. M. Shkarlet and S. N. Shubaev 502 159

Number 5 September-October, 1970

ULTRASONIC METHODS
Investigation of the Discernibility of Flaws in Concrete by Ultrasound—V. G. Lipnik and A. M. Filonidov 505 3
Theory of the Resonance Inspection Method. I—S. A. Filimonov and I. N. Ermolov 510 9
Radiation and Reception of Ultrasonic Vibrations at a Given Angle Using an Electromagneto-acoustic Method—A. V. Malinka 516 16
Some Questions Relating to Improving the Signal/Noise Ratio in Ultrasonic Testing —I. N. Ermolov and O. R. Zaborovskii 520 20
Increasing the Sensitivity of the Time Shadow Method of Ultrasonic Defectoscopy —Yu. M. Rapoport 525 26
Experimental Investigation into Ultrasonic Methods of Testing Grain Size of the Metal in Stainless Steel Kh18N9T Boiler Pipes—V. S. Grebennik 529 30
Echo-Pulse Ultrasonic Thickness Meter Having Increased Resolving Power and Accuracy —M. V. Korolev 536 38
Differential Method of Ultrasonic Inspection—S. E. Baryshev and V. G. Davydov 541 44

RADIATION METHODS
The Use of Fast Neutrons in Radiation Flaw Detection—V. I. Gorbunov, V. B. Elagin, and G. Sh. Pekarskii 547 53
Optimum Thickness of Metal Intensifying Screens for X-Ray Monitoring with the Aid of PMB-6 Betatrons—V. I. Gorbunov, L. G. Krasin, and G. V. Titov 550 56
Isotopic X-Ray Photography with a Radiation Background—A. N. Maiorov 554 61
Detection of Hidden Defects in Multilayer Printed Circuit Boards by Their Temperature Field —L. A. Vyatich and V. M. Skobelkin 558 65
Use of Radio-Isotope Testing Methods for Studying the Processes Involved in Preparation of Antimony—Lead Alloys in Electromagnetic Pumps of the Magnetodynamic Type —N. M. Kochegura, S. P. Kazachkov, E. A. Markovskii, V. I. Dubodelov, and V. P. Polishchuk 563 71

ELECTROMAGNETIC METHODS
Measurement of Coercive Force by a Self-Compensating Method in a Differential Magnetic Device—V. P. Tabachnik, L. A. Fridman, and G. S. Chernova 567 76

Limits within Which It Is Valid to Assume Linearity for Calculating a Nonuniform Magnetic Field in the Case of Soft-Magnetic Components—N. N. Zatsepin and V. E. Shcherbinin . . 571 80
Effects of Coercive Force and Thickness of Tested Articles on the Outputs of Coercive Force Meters Having an Attached Electromagnet—M. N. Mikheev, V. M. Morozova, G. V. Surin, V. P. Tabachnik, and L. A. Fridman 575 85
Ferrite Coercimeter with Attached Electromagnet and Compensation Winding—V. A. Zakharov, M. N. Mikheev, and V. M. Frantsevich 578 88
Monitoring the Decarbonizing of Bars of Ball-Bearing Steel Using the Method of Higher Harmonics—A. V. Maksimenko, A. T. Kubarev, A. Ya. Rachok, and V. V. Levitin. 585 95
Ferroprobe Anisometer for Investigating Magnetic Sheet Materials—N. L. Bryukhatov, V. N. Kuznetsov, and G. K. Morar' 589 99
Conductive Elliptical Cylinder in a Cross-Sectionally Varying Uniform Magnetic Field —V. K. Zhukov and R. M. Zakirov. 592 102
Formation of an Eddy Current Field of a Defect in the Form of an Extended Surface Crack —V. V. Vlasov and V. A. Komarov 599 109
Laws Governing Fatigue Failure of Steel Parts as Studied by Electromagnetic Testing Methods —Yu. P. Shagaev. 604 115

BRIEF COMMUNICATIONS
Technique for Ultrasonic Inspection of Thick-Walled Hollow Cylinders—A. Z. Raikhman, B. S. Svyatskii, and G. D. Belov 608 120
Instrument for Microwave Control of Dielectrics Using a Waveguide Magic-Tee Junction —A. S. Britan 610 121
Noise Suppression in Ultrasonic Flaw Detection—Yu. M. Rapoport and G. A. Chesnokov. 612 123
Experimental Gammascopy Device for Detecting Defects in Structures—M. P. Shlyak, S. I. Lapshin, L. N. Terekhin, A. I. Gorin, and V. Ya. Potapov. 614 125
IDTs-10 Apparatus for Ultrasonic Inspection of Pipe—M. F. Krakovyak 617 127
Determination of the Ferromagnetic Co Phase in Hard Powdered-Metal Alloys by Measurement of the Pull of a Permanent Magnet—M. M. Gavrilyuk and A. V. Davydovich. 621 131

BIBLIOGRAPHY
Capillary Nondestructive Testing Methods in the Foreign Technical Literature: 1966-1967 —E. A. Filimonova 623 133

CHRONICLES
Sixth International Conference on Nondestructive Methods of Quality Control—V. I. Borbunov . . 630 142

Number 6 November-December, 1970

ULTRASONIC METHODS
Fourth Scientific-Technical Conference on the Ultrasonic Defectoscopy of Welded Joints 633 3
Basic Parameters of Ultrasonic Control of Welded Joints, and the Principles of Their Standardization and Standardizing (Survey)—A. K. Gurvich and L. I. Kuz'mina 635 4
Set of Standard Samples and Auxiliary Devices (Code Name KÉU-1)—A. K. Gurvich, L. I. Kuz'mina, and I. I. Arbit 653 27
Evaluation of Segmental Reflectors in Test Specimens for Standardizing Sensitivity in Ultrasonic Inspection—V. A. Tsechal', V. L. Yushchenko, P. T. Yushchak, and N. V. Khimchenko 659 34
Use of Amplitude—Distance—Diameter Diagrams when Inspecting with Inclined Probes —I. N. Ermolov and V. G. Shcherbinskii 665 41
Scattering Indicatrix as a Source of Additional Information on Detected Defects —A. K. Gurvich and L. I. Kuz'mina 670 47
Investigation of Methods of Measuring the Apparent Height of Defects in the Case of Scanning

with an Inclined Probe—A. K. Gurvich and L. I. Kuz'mina 678 57
Comparative Evaluation of Methods of Measuring the Apparent Length of Defects
—A. K. Gurvich and V. A. Shchukin 685 65
Principles of Constructing Measuring Systems and Estimating the Nominal Size of the Defects
Detected in the Automatic Ultrasonic Testing of Welds—G. A. Krug and V. A. Yablokov . 690 71
The UKL-2 Slide Rule as an Aid in Ultrasonic Nondestructive Testing of Welded Joints
—M. Sh. Desyatnik and G. A. Krug 694 75
Measurement of Flaw Coordinates, and Time Selection of Pulse-Echo Signals in Automated
Inspection Using an Inclined Probe—A. K. Gurvich 697 78
Use of a Comparison Method for Measuring Coordinates in Automated Ultrasonic Testing
with an Inclined Search Head—G. A. Krug 705 87
Measuring the Noise Level of Oblique Scanners—V. V. Grebennikov and V. B. Bogod 712 96
Ultrasonic Method (Using No Reference Standard) for Measuring Width of Poor Penetration
Zone in Welded Tee Joints—A. K. Gurvich, M. Sh. Desyatnik, L. I. Kuz'mina,
and A. S. Kukli 715 99
Determination of the Height of Poor Fusion Zone in Unilateral Butt Welds of Small Thickness
by the Ultrasonic Shadow-Reflection Method—L. I. Smirnova and A. P. Smirnova 720 105
Ultrasonic Testing of the First (Radical) Layer of Welded Joints—A. Z. Raikhman,
Yu. S. Zakharov, S. N. Chistyakov, and V. N. Volkov 723 107
Main Parameters in the Ultrasonic Testing of Welds in Thin Copper Sheets
—A. K. Gurvich and Yu. P. Boldyrev 728 114

ELECTROMAGNETIC METHODS

On the Optimum Conditions for the Electromagnetic Testing of Annealed ShKh15 Steel
—A. V. Maksimenko and V. V. Levitin 730 116
Magnetization Curves of Ferromagnetic Rods of Finite Length with High Magnetic
Permeability—G. A. Burtsev and É. É. Fedorishcheva 734 120

RADIATION METHODS

Quality Norms for Spot Welds—L. S. Fel'dman, L. M. Burchenkova, I. V. Oryshich,
and A. V. Grechukha 739 126

BRIEF COMMUNICATIONS

Losses upon Reflection of an Ultrasonic Beam from a Free Boundary—V. M. Merkulova 745 133
Eddy Current Inspection of Small Changes of the Properties of Ferromagnetic Steels
Following Surface Treatment—P. I. Beda 748 135
Electroacoustic Transducer for Contactless Excitation of Ultrasonic Oscillations in Metals
at High Temperatures—L. D. Kruglov, Yu. M. Shkarlet, A. A.Bertman,
and G. D. Shnyrev 750 137
Phase-Contrast Introscopy—A. A. Kapustin, G. B. Yatsevich, and V. I. Zaretskii 752 139
Investigation of the Spectra of X-Ray and Gamma Radiation in Scintillation Defectoscopy
—V. S. Gostishchev, V. B. Kuznetsov, G. M. Nosova, and V. P. Lopaev 754 140
Echo-Signal Evaluation of Ultrasound Attenuation—G. N. Pudov 758 143
Improvements in Ultrasonic Immersion Inspection of Metal Rods—M. É. Khurgin
and F. A.Zhislin 761 145
